READ SAFETY DIRECTIONS BEFORE OPENING OR USING

DYFLY

Spray-On Sheep Blowfly Treatment

ACTIVE CONSTITUENT: 50 g/L DICYCLANIL

For the protection of sheep, either off-shears or with any length wool, against fly strike (caused by dicyclanil-susceptible strains of blowflies (*Lucilia cuprina*)) for 18 to 24 weeks.

For the protection of mulesing and marking wounds on sheep against fly strike (caused by dicyclanil-susceptible strains of blowflies (*Lucilia cuprina*)) during the wound healing process.

DYFLY contains dicyclanil, a member of the pyrimidine group of chemicals. It is effective against strains of *Lucilia cuprina* that are sensitive to dicyclanil. It is not as effective against strains of *Lucilia cuprina* that develop resistance to dicyclanil. Resistance may develop to any chemical.

Ask your local veterinary practitioner or animal health adviser for recommended parasite management practices for your area to reduce development of resistance.

FOUR SEASONS
AGRIBUSINESS

DIRECTIONS FOR USE

Restraints:

DO NOT use on ewes which are producing or may in the future produce milk that may be used or processed for human consumption.

DO NOT re-treat animals for a minimum of 9 weeks after last treatment.

Dosage and Administration

Dyfly Spray-On is applied as a low-volume treatment onto areas where protection is required. When applying Dyfly, the nozzle of the applicator gun should be high enough above the fleece (approximately 15 - 25 cm), to achieve a 15 cm wide band at each pass for protection of body strike.

For treatment of mulesing wounds, the band must be wide enough to cover the wound and 25 mm onto the surrounding wool.

DO NOT apply during gusty or windy weather as spray drift may reduce the period of protection. It is good agricultural practice for mulesing/marking to be carried out at times of minimal fly activity.

Reduced efficacy may occur in sheep affected with dermatophilosis.

SHAKE WELL BEFORE USE

FOR THE PREVENTION OF BODY STRIKE (Diagram 1)

| SHEEP WEIGHT (KG) | TOTAL VOLUME / SHEEP (ML) | VOLUME PER TREATMENT BAND (ML) | NO. OF BANDS |
|-------------------|---------------------------|--------------------------------|--------------|
| 10 - 20 | 14 | 7 | 2 |
| 21 - 30 | 16 | 8 | 2 |
| 31 - 50 | 20 | 10 | 2 |
| > 50 | 24 | 12 | 2 |

FOR THE PREVENTION OF BREECH STRIKE (Diagram 1)

| SHEEP WEIGHT (KG) | TOTAL VOLUME / SHEEP (ML) | VOLUME PER TREATMENT BAND (ML) | NO. OF BANDS |
|-------------------|---------------------------|--------------------------------|--------------|
| 10 - 20 | 7 | 7 | 1 |
| 21 - 30 | 8 | 8 | 1 |
| 31 - 50 | 10 | 10 | 1 |
| > 50 | 12 | 12 | 1 |

FOR THE PREVENTION OF FLY STRIKE AFTER MULESING (Diagram 2)

| SHEEP WEIGHT (KG) | TOTAL VOLUME / SHEEP (ML) | VOLUME PER TREATMENT BAND (ML) | NO. OF BANDS |
|-------------------|---------------------------|--------------------------------|--------------|
| Up to 30 | 8 | 4 | 2 |
| 31 - 50 | 10 | 5 | 2 |

- Apply two bands, one over each side of the mulesing wound and overlapping 25 mm onto the surrounding wool.

FOR THE PREVENTION OF FLY STRIKE AFTER MARKING (Diagram 3)

| SHEEP WEIGHT (KG) | TOTAL VOLUME / SHEEP (ML) | VOLUME PER TREATMENT BAND (ML) | NO. OF BANDS |
|-------------------|---------------------------|--------------------------------|--------------|
| Ram lambs | 8 | 4 | 2 |
| Ewe lambs | 4 | 4 | 1 |

- When a tail has been amputated, apply 4 mL over the crutch ensuring sufficient coverage of the open wound.
- When the tail has not been amputated, ensure sufficient coverage of the tail where the rubber ring has been applied.

In the case of ram lambs a further 4 mL can be sprayed over and around the scrotem area after the rubber ring as been applied.

FOR THE PREVENTION OF POLL STRIKE (Diagram 1)

- Rams and sheep susceptible to poll strike should be treated. Apply 5ml of Dyfly Spray-On to the areas requiring protection, around the poll and horns.

CRITICAL COMMENTS

- Use only a spray-on application gun.
- Ensure the applicator gun is clean.
- Calibrate applicator gun using an accurate volume measure.
- Ensure all areas to be protected are treated.
- When preventing body strike ensure bands overlap along the mid-line.
- When protecting from mulesing wounds from fly strike, take special care to treat the wound and the surrounding 25 mm wool.
- When protecting marking wounds from fly strike, take special care to treat the wound and surrounding wool.
- This product is not recommended for treating existing strikes. Use a product registered as a dressing for existing strikes.
- Heavy rain following the application of this product could diminish the period of protection. DO NOT apply during gusty or windy weather as spray drift may reduce the period of protection.
- Dyfly Spray-On contains a scourable colouring agent for easy band identification.
- Withholding periods must be observed following application for any purpose, including after mulesing/marking as finite residues will occur.
- It is good agricultural practice for mulesing/marking to be carried out at times of minimal fly activity. Reduced efficacy may occur in sheep affected with dermatophilosis.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

GENERAL DIRECTIONS

Dyfly Spray-On provides season long protection to sheep against body, breech and poll strike and may be used either off-shears (within 24 hours of shearing) or on sheep with any length wool (Short Wool: greater than one day and up to 6 weeks after shearing; Long Wool: greater than 6 weeks after shearing).

Dyfly Spray-On also protects mulesing and marking wounds on lambs against fly strike during the wound healing process. The dose volume is determined by the weight of sheep being treated.

Apply Dyfly Spray-On according to the diagrams and tables in the Directions for Use. DO NOT dilute. DO NOT mix with any other product. Apply directly from the container or an appropriate back pack using a spray-on applicator gun. Dyfly Spray-On may be applied to all breeds of sheep to obtain protection against fly strike.

Significant soiling with dags, mud, dust or urine may reduce efficacy. Where significant dags are present, a light crutching is indicated prior to treatment. Protection period may be reduced if sheep scour heavily following application.

WITHHOLDING PERIODS

MEAT: DO NOT USE less than 28 days before slaughter for human consumption.

MILK: DO NOT USE on sheep which are producing or may in the future produce milk that may be used or processed for human consumption.

WOOL HARVESTING INTERVAL: DO NOT USE less than 3 months before shearing or fibre collection.

TRADE ADVICE

EXPORT SLAUGHTER INTERVAL (ESI): DO NOT USE less than 120 days before slaughter for export. The ESIs on this label was correct at the time of label approval. Before using this product, confirm the current ESI from the registrant 1300 449 255 or APVMA website (www.apvma.gov.au/residues).

Use of this product may result in wool residues that may not comply with European Union environmental quality standards. Wool treated with this product may contain detectable residues; adequate treatment records should be kept and made available, if requested by wool buyers.

SAFETY DIRECTIONS

May irritate the eyes and skin. Avoid contact with eyes and skin. When opening the container and using the product, wear elbow-length rubber gloves. Wash hands after use.

FIRST AID

First aid is not generally required. If in doubt, contact a Poisons Information Centre. Phone Australia 131 126.

ADDITIONAL USER SAFETY

Sheep Rehandling Interval: After treatment wait until sheep are dry before rehandling.

ENVIRONMENTAL PROTECTION

DO NOT contaminate dams, rivers, streams or other watercourses with the chemical or used container.

DISPOSAL

Triple-rinse container and dispose of rinsate in compliance with relevant local, state or territory government regulations. Do not dispose of undiluted chemicals on-site. If recycling, replace cap and return clean container to recycler or designated collection point. If not recycling, break, crush, or puncture container and deliver to an approved waste management facility. If an approved waste management facility is not available, bury the broken, crushed or punctured containers 500 mm below the surface in a disposal pit specifically marked and set up for this purpose clear of waterways, vegetation and tree roots, in compliance with relevant local, state or territory government regulations. Do not burn empty containers or product.

STORAGE

Store below 30°C (room temperature). Protect from frost. Store in original container tightly closed in a dry, cool place. DO NOT store in direct sunlight. DO NOT re-use the container. KEEP OUT OF REACH OF CHILDREN.

SAFETY DATA SHEET

Additional information is listed in the Safety Data Sheet (SDS) which is available from the supplier.

CONDITIONS OF SALE

The sale, supply, storage, use and application of this product is beyond the control of the manufacturer, and, subject to this provision, all warranties, conditions, rights and remedies express or implied under common law, statute or otherwise, in relation to the sale, supply, storage, use or application are excluded. Four Seasons Agribusiness Pty Limited and its associated entities shall not accept any liability whatsoever (including consequential loss) or however arising (including negligence) for any damage, injury or death connected with the sale, supply, storage, use or application of this product except for liability which cannot be excluded by statute.

Harmful to aquatic life with long lasting effects. Avoid release to the environment. Wear protective gloves, protective clothing and eye or face protection. IF SWALLOWED: Rinse mouth. Do NOT induce vomiting. In case of fire, use carbon dioxide, dry chemical, foam, water fog.
